

Is your business suffering
from Covid-19 lockdown, too?

GET 3 for FREE

Receive 3 months of
Canon's Process automation software
WITH NO CONDITIONS!

It's never too late to automate.

Canon
CANON GROUP

The Covid-19 pandemic is harming rather all of us. Lockdowns result in less business which leads to short-time working or even more severe decisions. Dislocated staff suffers from poor or no access to incoming communication. The increasing Email communication results in a weak centralized process governance. Processes get stuck or delayed. Sales orders, deliveries or in-voices can't be processed what even spins the negative spiral.

In a nutshell: the economic system is co-infected by Covid-19. The weaker the level of digital transformation in an organization is, the more dangerous the situation becomes. Help is needed and on its way, because it is never too late to automate.

We support your path from stabilization to recovery with three months complimentary use of our software. In later phases we consult you, scaling further from recovery to business development and prevent future impacts.

STABILIZE - RECOVER - DEVELOP - PREVENT

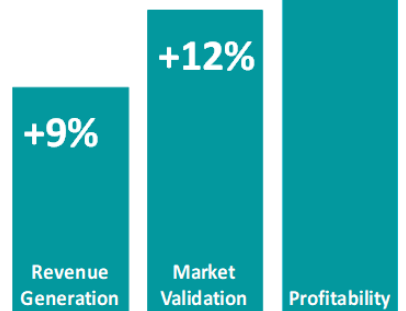

Canon offers award-winning, AI-empowered solutions for process automation. Our technologies get your data where it ought to be: in process! We fuel your workflows. Digital document classification and automated data capturing are the entry point into your digital transformation journey. Manage your business processes independently from your staff's availability or its location and collaborate with your business partners.

- Cost cutting,
- minimized processing time,
- quality improvement
- process transparency and
- business development

will result in an optimized customer experience with the side effect for your organization of extended competitiveness and increased customer retention. The sooner you reach out to us, the sooner we will help.
