# IRIS P&T | The Mission

***We develop solutions & services to capture Data,  
automate processes, manage content and transform  
unstructured data into ready-to-use, easy-to-archive  
& easy-to-share information***

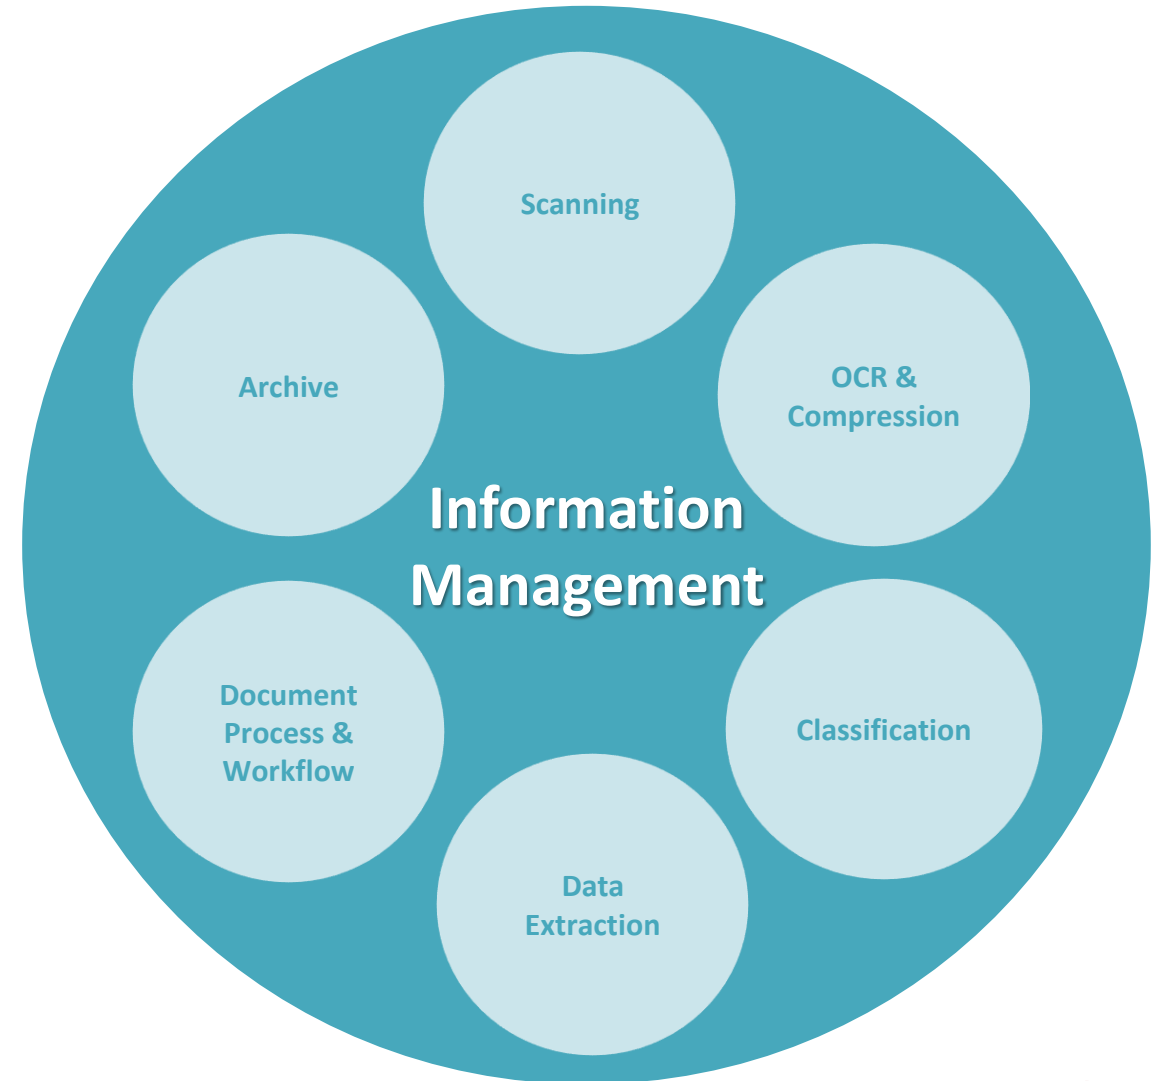

# IRIS P&T | Facts & Numbers

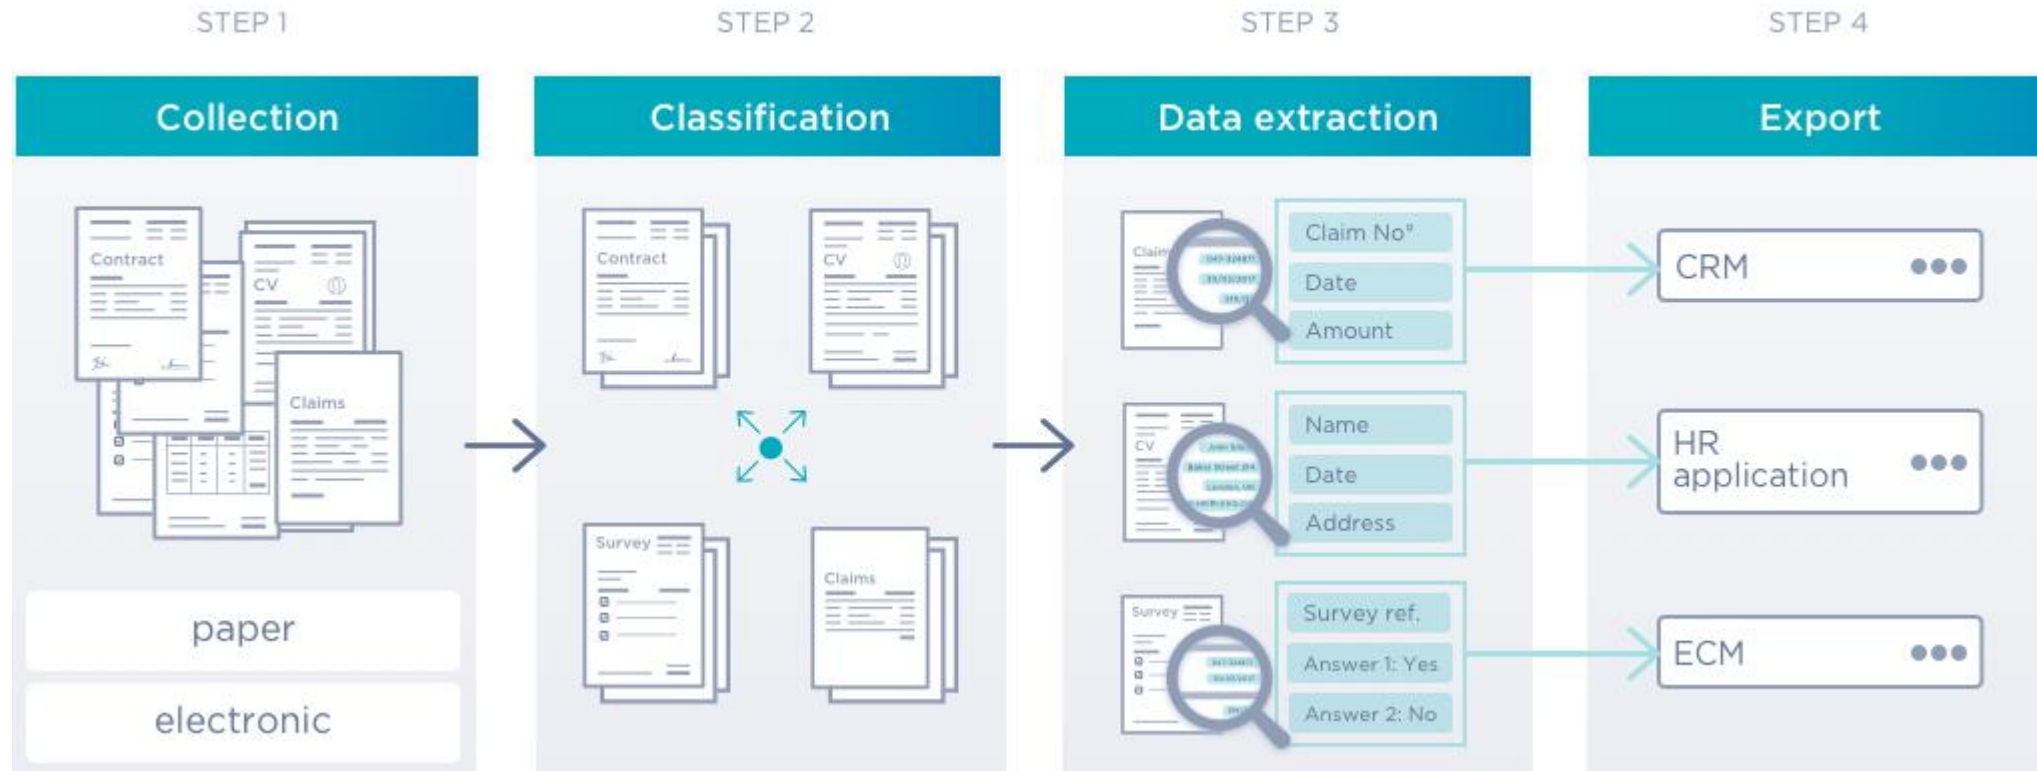

# IRIS' Expertise

## 100% IP

All these technologies are developed and maintained by IRIS. **We own 100% of the intellectual property**

Multiple channels to import your documents

Straightforward configuration, allowing almost-unlimited document types

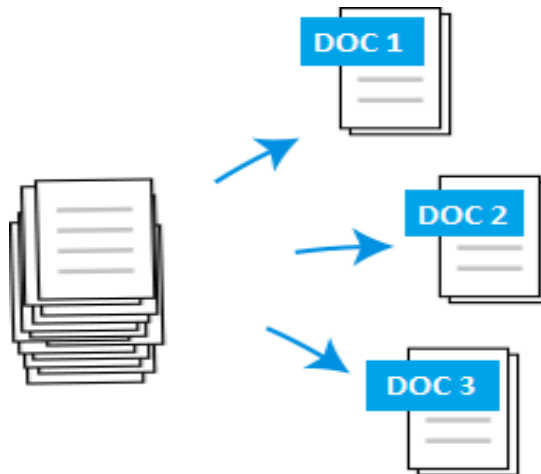

Freeform, template-free extraction. You decide what fields you need per document type

Depending on their type, documents and the data captured are routed where you need them to be

# Document Separation “the modern way”

- Automatic separation within IRISXtract™
- Process Add-on Document Separation (PADS) new version available
- Based on a ruleset optimized for each customer expectation
- Processing of constant stream of pages
- Separation process line comes before the extraction process line

# Do we get a ROI on Automatic Separation? (1)

1. **Barcode dispenser:** 50€
  2. **Barcodes:** 1.5ct each Barcode label
  3. **Labour costs:** 1.5ct per second of labour on average. Putting a barcode label on a document takes at least 3 seconds
- **Total cost:** Each document costs at least 6ct to separate with a Barcode

## Do we get a ROI on Automatic Separation? (2)

### Barcode vs Automatic. E.g. 60k pages

- 40k barcodes = 2.400€
- PADS for 60k pages = **1.010€**

### Moreover

With PADS, you can **process more** documents for the **same cost**. Indeed, IRISXtract page count is lower as the Analyse is no longer looking at attachment pages for a separation criteria.

# Live Demo

# Benefits of automatic Document Separation

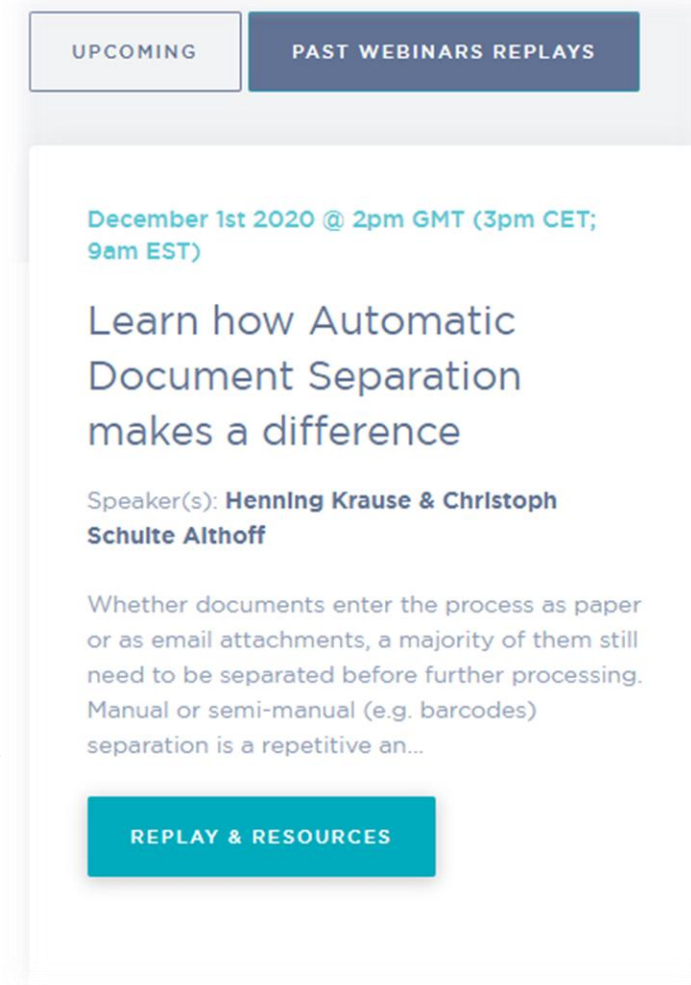

- Reduction of manual labor
    - No longer placing barcodes as document separator or on attachments
    - No sorting in and out of separator sheets
  - Process more documents for the same cost
    - Reduction of page consumption
- ROI in Extraction and Classification projects is reached more quickly

# Questions ?

Thank you!

UPCOMING PAST WEBINARS REPLAYS

December 1st 2020 @ 2pm GMT (3pm CET; 9am EST)

### Learn how Automatic Document Separation makes a difference

Speaker(s): **Henning Krause & Christoph Schulte Althoff**

Whether documents enter the process as paper or as email attachments, a majority of them still need to be separated before further processing. Manual or semi-manual (e.g. barcodes) separation is a repetitive an...
