Integration possibilities at IRIS

Speaker(s): **Pierre Deschamps**

REGISTER NOW

Over the years we've developed many different technologies at IRIS. All these technologies are used in our various products. **But did you know that we can provide them to you, in order to integrate them into your own application?** The offering of our technology includes OCR, ICR, barcode, compression, document classification, data extraction, etc.

Not only can you integrate them as toolkits but also white label or bundle one of our product for you. Finally, we could also offer some of our technologies in the cloud. **Join our webinar to learn more about what we have to offer and some ideas of our business models.**
