

EFFECTIVE DATA CAPTURE TO ENSURE AN INTELLIGENT HOSPITAL

DIGITIZATION OF PATIENT DOCUMENTATION WITH
HELP OF IRISXTRACT™

FACTS

PARTNER/CUSTOMER

- Canon OY / Central Finland Health Care District (KSSHP)

IRIS TECHNOLOGY

- IRISXtract™

THE SOLUTION

- In connection to moving to new hospital, the customer identified the need to digitize old patient files.
- Patient files are important to have in a digital form so that medical professionals can search and access the files easily. Patient security is also improved when all data is at hand quickly and in a reliable manner when making medical decisions.
- In the first step the documents are scanned. Thanks to the Hybrid Forms solution of IRISXtract™ the documents are classified automatically and correct metadata is captured.
- Documents are exported to an electronic archive system with the correct metadata.

BENEFITS

- Properly digitized information has decreased the time to find information to a minimum improving the efficiency of health care personnel attending to a patient.
- Archive space was saved since documents are not saved in paper format.
- Patient data in digital format is supporting KSSHP compliance to GDPR regulations.
- Patient data disclosure with authorized officials is easier when all data is in digital format.
- Ensuring of data security and transparency.

**Sairaala
Nova**

KEY FACTS:

- 4,8 million images per year
- Security and Transparency
- Saving time and costs

CENTRAL FINLAND HEALTH CARE DISTRICT:

Health care personnel at KSSHP need patient data daily and it is important for us to be able to access correct information as easy as possible. The results with IRISXtract™ are brilliant and helps us in patient work. Information that is in electronic format with associated metadata is improving patient safety and ensuring fluency of work.
