IRISPowerscan™

I.R.I.S.
A CANON COMPANY

Canon
CANON GROUP

WHERE TO START

WHEN SO MUCH IS POSSIBLE

IRISPowerscan™ acts as the front end to the document/data journey into Laserfiche® . IRISPowerscan™ is not a final destination for your document images and/or extracted information captured. Such metadata and/or images are done from intelligent capture by IRISPowerscan™, then handed over to Laserfiche® through SDK integration. This add-on technology in no way replaces your Laserfiche® ECM.

Let's start with forms. Typically, Laserfiche® forms require manual entry for initializing a process. While some limited data can be captured automatically, the capture part is limited. If this is not sufficient, the form entry remains powered by manual entry from documents. Placing an intelligent capture technology in front of your processes, is just one of the many ways you can empower your business. Our intelligent extraction can initiate forms processes quickly, minimizing the number of forms used.

Powerful features like automatic document separation, forms initializing, and workflow assistance are just the tip of a capable intelligent capture technology. These tools can be extremely helpful and time saving. Enhance your Laserfiche® experience through intelligent digital capture!

Take your Laserfiche® solutions to the next level with IRISPowerscan™

PROBLEM

Collecting and capturing paper and electronic documents accurately can be time consuming and resource intensive.

SOLUTION

This is where IRISPowerscan™ comes into play. It scans, sorts, renames and routes documents and key indexes into your Laserfiche® environment.

WORKS WITH BOTH LASERFICHE® AND LASERFICHE® CLOUD

ADDED VALUE

We all know how useful Laserfiche® can be with finding data or documents easily. Imagine if this could be enhanced further... When Laserfiche® is powered with IRISPowerscan™, time and effort is significantly reduced. The added value of IRISPowerscan™ does not stop once the data and document enter Laserfiche®. Benefits of our process automation and intelligent capture software are enjoyed through out the life of the document.

" **30% of time spent searching for, governing, preparing data**
(IDC)

- IRISPowerscan™ efficiently prepares and formats data for you
- IRISPowerscan™ improves metadata for easy to find access through Laserfiche®
- Tagging documents with IRISPowerscan™ allows you to enhance your searches

" **50% of business leaders say that they're planning to accelerate the automation of repetitive tasks within their organization**
(World Economic Forum)

- IRISPowerscan™ is quick and easy to setup
- IRISPowerscan™ easily replaces repetitive tasks
- IRISPowerscan™ uses AI and machine learning to do more with the information it finds

" **19% of office workers time search & gathering info**
(McKinsey)

- IRISPowerscan™ automatically separates and sorts your documents before archiving them making the entry to Laserfiche® effortless
- Intelligent data capture by IRISPowerscan™ enriches data allowing you to easily find more of what you are looking for

UNLOCK YOUR WORKFLOWS POTENTIAL

Workflows can bottleneck where manual approval is needed. Mindful of such issues, IRISPowerscan™ can apply any number of rules/conditions to any situation. This awareness can help you with your different workflows in many ways. First, our data insights gives you an advantage with your Laserfiche® workflows. Secondly, IRISPowerscan™ can reduce the lifetime of a document in a workflow by placing it dynamically where it needs to be using what it understands about the document. This results in faster workflow lifecycles. Thirdly, IRISPowerscan™ can help you achieve shorter workflows due to the fact it can replace many tasks generated inside of your workflow.

IRISPowerscan™

Identify document and capture necessary meta and para data

Using rules and conditions, key Laserfiche® fields are collected or updated

Detects the appropriate stage to insert document in your Laserfiche® workflow(s)

Expedited workflow completion, reducing user interaction

X + L = ▶▶

FASTER WORKFLOWS

AWARENESS MATTERS

IRISPowerscan™ has the capability of tagging your documents. With Intelli-Tags, you can easily find and sort what you need faster inside of Laserfiche®.

PDF   DATA

IRIS INSIGHTS

IRIS Insights help you rapidly retrieve and visualize data in a new way. Insights include field classification, pdf tags, statistics, database information, and document analytics outside of the data captured.

INDUSTRY PERFORMANCE IMPACTS

INSURANCE

Eliminates the need for manual form completion. Expedites claims processing and policy underwriting workflows through a streamlined / automated approval process.

GOVERNMENT

Modernize data through highly scalable solutions with powerful capture and compressed PDFs can provide easily accessible information connecting communities with digital access.

EDUCATION

Reduce costs and enhance staff productivity with the removal of manual entry. With high-speed scan client tools, easily sort, classify, and index incoming transcripts, records, and more with power.

HEALTHCARE

Easily safeguard patient/medical information in a protected manner by identifying the document's level of sensitivity. Generate faster approvals as well as in-depth productivity insight for your reporting.

MANUFACTURING

Deliver enhanced business and optimize operational benefits. Receive and send instant inventory/supply chain information access within seconds and improve your data's integrity.

FEATURES

Templates
Write Metadata to any pre-existing Laserfiche® Template

Folder/File Naming
Customize Folder (or Subfolder) & File names inside Laserfiche®, based on any combination of IRIS Captured Values, User Tokens, Condition Rules, and much more

PDF Options
PDF creation comes with all Standard PDF options or Compressed PDF (50x) capabilities using IRIS patented iHQC™ compression

Modular Workflow Entry
Every IRISPowerscan™ export includes optional conditions also known as conditional identification. This process allows every export performed to only execute if/when the condition is met. Jobs involved with a workflow no longer need to start at the beginning. IRISXtract™ dynamically identifies each export for Laserfiche®. This process removes most bottlenecks experienced in a workflow.

Supports up to four simultaneous connections per user.

Automatically inherits user properties and permissions

Production Ready

Laserfiche® Approved
