

IRISTMPulse

AI Xtract

Transform Documents Into
Business-Ready Data with AI

Intelligent Document Processing Platform

IRIS Pulse™ AI Xtract is a cloud based, AI powered platform that transforms unstructured documents into structured, validated, business ready data. It eliminates manual data entry, accelerates business processes, and integrates seamlessly into existing systems—from IRIS on premises solutions like IRIS Xtract™ and IRIS Powerscan™ to cloud workflows and third party tools via REST APIs.

Primary Use Cases

Financial Operations

Automatically extract key fields from invoices, receipts, and payment documents—invoice numbers, dates, amounts, vendor details, and line items. Results can be integrated into IRIS on prem systems or IRIS Pulse apps such as Digital Mailroom, or into any ERP/ECM via REST API. Processing times drop from minutes to seconds, with significantly fewer errors.

Supply Chain Management

Process purchase orders, delivery notes, and shipping documents instantly. Organizations gain real time visibility into what was ordered, shipped, or received—without manual reconciliation.

Human Resources

Automate onboarding documentation, application files, and personnel records. All documents become searchable and structured, helping HR teams focus less on administration and more on talent strategy.

Contract & Compliance Management

Analyze contracts, agreements, and legal documents for obligations, renewal dates, and key terms. Automated alerts ensure no deadlines or commitments are missed.

Customer Service

Extract individual key information instantly to deliver faster, more accurate responses, powered by personalized extraction services.

Key Capabilities

Pre Built Extraction Services

Invoices, purchase orders, ID cards, contracts, delivery notes, and more. Ready to use on day one—no configuration needed.

Custom Service Designer

A visual, no code interface to build your own extraction services. Define fields, test with sample documents, and deploy instantly.

Validation & Quality Control

Add validation rules to ensure data meets your quality standards. Confidence-based validation

ensures accuracy before integration.

Enterprise Integration

Connect easily via native IRIS connectors, REST APIs, webhooks, emails, shared folders, scanners, or other applications.

Multi Tenant Architecture

Serve multiple departments or organizations from one platform with isolated data, configurations, and user management.

Target Environments

- **Medium to Large Enterprises**
Handle ≥ 500 documents/month and seek cost reduction & efficiency gains.
- **Shared Service Centers**
Standardize processes across multiple business units with centralized oversight.
- **Business Process Outsourcers**
Deliver scalable, client-specific document automation services.
- **Digital Transformation Projects**
Replace paper processes with fully digital, automated workflows.

Implementation Approach

Organizations typically start with high volume document types using pre built services, validate the output, then expand to custom extractions.

As a cloud platform, AI Xtract requires minimal infrastructure—IT involvement focuses mainly on integration.

Business Impact

AI Xtract delivers immediate and strategic value:

- **Finance** gains real time visibility into payables and receivables.
- **Procurement** gets instant insight into orders, deliveries, and discrepancies.
- **Compliance teams** benefit from searchable archives and automated retention policies.
- **Employees** are freed from repetitive data entry and can focus on higher value work.

Operational Workflow

1 Import

Documents arrive via email, uploads, scanning, or API and are automatically queued.

2 Processing

AI detects document type and extracts relevant fields within seconds—no matter the document complexity.

3 Validation

Low confidence fields are reviewed; high confidence results pass automatically based on configurable rules.

4 Distribution

Structured data is delivered to target systems. Documents are archived with full audit trails.

Document Categories

Category	Description	Examples
Essential Extraction	Basic info, summaries, NER	Reports, letters
Transactional Extraction	Structured business processes (P2P)	Invoices, orders
Contractual Extraction	Complex, semantically rich content	Contracts, agreements
Custom Extraction	Organization specific layouts	Forms, domain specific docs

About IRIS

Our mission

IRIS is under the top companies in intelligent document processing (IDP) for Purchase-to-Pay (P2P) and Digital MailRoom solutions. Our leading AI driven cloud platform for document understanding enhances productivity and business efficiency by automating processes and extracting valuable insights from documents. We offer a range of off-the-shelf products and bespoke solutions through our international network of partners. Lighthouse projects and technologies are successfully delivered by IRIS to key customers.

Facts and Figures

- An Information Management Industry leader for 35+ years
- A state-of-the-art professional actor on IDP market since start
- A Key Asset of the Canon Group since 2013
- Global worldwide reach with main focus on EMEA & US
- Above 5.000 implementations of IRISXtract™ platform worldwide
- Network of more than 200 integrators, VARs and BPOs around the world
- Largest Personal Mobile Scanner portfolio available on the market
- Above 40 million daily users of IRIS Technology worldwide
